

Atomic Finds ATX — AI, Permissions & Working Handoff

For: Jennyfer, owner of Atomic Finds ATX

Set safe limits for AI assistance, customer-content use, approvals, and team handoff.

Suggested Finish-By

September 19, 2026

Status

DRAFT – Pending Jennyfer's review

How AI Helps (And What It Can't Do)

AI can help organize, transcribe, summarize, draft, and flag missing information. It cannot invent product facts, make final pricing or condition decisions, publish content, promise anything to buyers, or use private customer information without permission.

AI Can

- Organize and transcribe
- Summarize and draft
- Flag missing information

AI Cannot

- Invent product facts
- Make pricing or condition decisions
- Publish content or promise buyers anything
- Use private customer info without permission

What AI May Help With

Check all that apply for your shop:

Inventory & Records

- ☐ Turn intake notes into a draft inventory record
- ☐ Transcribe labels, tags, measurements, and handwritten notes from photos
- ☐ Standardize measurements
- ☐ Suggest public-name options
- ☐ Generate correct PNG filenames from the naming standard
- ☐ Create internal checklists and status reminders

Research

- ☐ Create research checklists and search queries
- ☐ Summarize stored research sources without adding claims
- ☐ Compare public copy with the verified record and flag mismatches

Content & Copy

- ☐ Draft Marketplace listings from verified records
- ☐ Draft website copy from verified records
- ☐ Draft Instagram captions from verified facts
- ☐ Draft accurate condition-disclosure wording from approved notes
- ☐ Draft Canva briefs/copy for real-item assets
- ☐ Translate finalized English factual copy into Spanish for review

Other

Other:

--

Human-Only Decisions

These require **your approval**, Jennyfer. Check all that apply:

Inventory & Pricing

- ☐ Final acceptance/rejection of inventory
- ☐ SKU assignment
- ☐ Pricing
- ☐ Condition and safety assessment
- ☐ Repair/restoration claims

Provenance & Publishing

- ☐ Maker, designer, era, origin, and provenance approval
- ☐ Marketplace publishing
- ☐ Availability, Pending, Adopted, and status changes

Customer Relations

- ☐ Customer-message commitments
- ☐ Pickup details, deposits, holds, refunds, or returns
- ☐ Permission decisions for customer photos, reviews, and testimonials

Other: _____

Verification and Approval

Every factual claim in public inventory copy must trace to a verified field or source saved in the item's inventory record. If the record does not support a claim, AI must mark it for verification, ask a targeted question, omit it, or use approved uncertainty wording.

Do you approve this rule?

- ☐ Approved
- ☐ Revise – notes below:

If revise, please note:

3a. Where Should Research Live?

Where should research links, screenshots, quotes, and notes be stored?

- ☐ In the item record
- ☐ Google Drive research folder linked from the item record
- ☐ Both

Other:

Why This Matters

Traceability protects Atomic
Finds ATX from publishing
unverified claims – keeping your
reputation and your buyers safe.

What Needs Human Review Before Publishing?

Check all that must be reviewed by **you** before going live:

Copy

- ☐ Every item description
- ☐ Condition statement
- ☐ Era/maker/material/provenance statement
- ☐ Marketplace title

Pricing

- ☐ Price

Social & Language

- ☐ Instagram caption with factual claims
- ☐ Spanish translation

Visuals

- ☐ Image/graphic before upload

Other: _____

When Facts Can't Be Verified

What should AI do when a fact cannot be confirmed from the item record?

Check all approaches you'd like AI to use:

- ☐ Leave a visible [verify] placeholder internally
- ☐ Ask a targeted question
- ☐ Use neutral copy that does not make the claim
- ☐ Move the item to Needs Verification

Other: _____

Privacy and Permission

The following must **never** be pasted into general AI tools or shared outside approved systems:

		
Buyer Identity ☐ Buyer names, addresses, or precise pickup locations ☐ Phone numbers and private email addresses	Communications ☐ Private messages without permission ☐ Customer-home images without documented permission	Financial ☐ Payment information

Other: _____

I confirm the above privacy rules.

- ☐ Yes – I confirm
- ☐ No – I have questions first

Date: _____

Customer Permission Requests

May AI help draft outreach to customers for content use?

Draft Permission Requests For:

- ☐ Customer photo-use permission requests
 - ☐ Review/testimonial approval requests
-

Your Answer:

- ☐ Yes – AI may draft these
- ☐ No – I'll handle these myself
- ☐ Later – revisit this decision

Why This Helps

Having AI draft the initial ask saves time while keeping you in control of what goes out. You always review before sending.

Handoff, Approval Workflow & Language Rules

How Should Drafts Reach You?

- ☐ AI draft → Jennyfer reviews in shared document
- ☐ AI draft → Anthony formats it in CMS → Jennyfer approves
- ☐ AI draft → inventory record gets a review status

Other:

What Counts as Final Approval?

- ☐ Jennyfer responds in writing
- ☐ Jennyfer changes a record to APPROVED
- ☐ Jennyfer publishes it herself

Other:

Language & Translation Rule

English factual copy is the source version. Spanish is drafted only after English approval and must be human-reviewed for matching meaning, policy, and buyer instructions.

Do you approve this rule?

- ☐ Yes – approved as written
- ☐ No – I'd like to revise
- ☐ Revise – notes below:

If revise:

- ☐ This completed questionnaire becomes the working agreement between Jennyfer and the AI/team. Keep a signed copy on file and revisit any time your workflow changes.
