

Atomic Finds ATX — Operations, Inventory & AI Workflow Questionnaire

Status: DRAFT

Primary use: Internal implementation and governance record.

Owner decision inputs are collected through four shorter questionnaires:

- 1. Operating Model & Public Boundaries
- 2. Inventory, SKU & Photo Intake
- 3. Listing, Website & Status Workflow
- 4. AI, Permissions & Working Handoff

Use this master to consolidate confirmed answers, configure the CMS, create templates, and run the first real-item test batch.

Purpose: This is the primary working questionnaire for setting up a repeatable, accurate Atomic Finds ATX operating system. It assumes the brand direction and Phase 1 website model are already established: a curated showroom and inquiry hub that bridges to Facebook Marketplace, rather than a full ecommerce store.

How to complete: Short answers are welcome. Check boxes where useful. If something is undecided, write Not decided—the workflow will keep that field internal or neutral until Jennyfer confirms it. Do not enter a guess for an item's history, maker, era, condition, price, dimensions, or availability.

Design System <u>pilot.atomicfindsatx.store/design-system</u> – Reference for approved website components, content patterns, labels, and visual implementation	Pilot Website <u>pilot.atomicfindsatx.store</u> – Current Phase 1 showroom and Marketplace-bridge experience	GitHub Repository <u>github.com/Atomic-Finds-ATX/ds</u> – Website source, design-system implementation, and change tracking
Claude Tools Claude organization invitation – Research, drafting, structured extraction, workflow assistance, and review—always with owner verification	Canva Tools Canva Brand invitation – Brand-aligned marketing graphics and editable templates	CMS Suite <u>cms.digitalallies.net/admin/login</u> – Website content, product records, and publishing workflow
Instagram <u>instagram.com/atomicfindsatx</u> – Discovery, storytelling, real inventory/process content, and repeat attention	Facebook Marketplace Jennyfer's Marketplace profile – Current live-listing and buyer-conversion channel	Public Email <u>atomicfindsatx@gmail.com</u> – Use only if Jennyfer confirms it remains approved for public contact

1. Confirm the Operating Model

These answers define what the team builds around. They do not reopen the brand direction.

1.1 Phase 1 Customer Flow

Is this the correct default customer flow?

☐ Website → item-specific Marketplace listing or item-specific inquiry → Jennyfer confirms availability → Austin pickup by arrangement.

☒ **Yes**
Approved as described

☒ **Mostly; revise:**

☒ **No; preferred flow:**

For an Available item, which next step should be the default?

- ☐ Open the exact, verified Facebook Marketplace listing
- ☐ Open a product-specific website inquiry
- ☐ Offer both, with Marketplace first
- ☐ Offer both, with inquiry first
- ☐ Other: _____

Who is responsible for changing item status after an item is listed, becomes pending, changes price, sells, or is removed?

- ☐ Primary owner: _____
- ☐ Backup owner: _____
- ☐ Where should the update be reported first? (CMS / inventory sheet / message / other): _____
- ☐ Expected update timing after a sale: _____

1.2 Confirmed Public Boundaries

Confirm this approved pickup language, or revise it:

☐ Austin pickup by arrangement. Message Jennyfer to confirm availability and coordinate pickup details.

☒ **Approved as written**

☒ **Revise:**

Confirm each item below remains **not public** unless Jennyfer supplies an approved policy or current source record:

- ☐ Delivery or white-glove delivery claims
- ☐ Pickup address or precise pickup location
- ☐ Public business hours
- ☐ Deposits, holds, payment plans, or refunds
- ☐ Returns or exchange promises
- ☐ Phone number or any alternate contact method
- ☐ Mover recommendations or service promises
- ☐ "Fully restored," "professionally restored," or equivalent blanket claims
- ☐ Ratings, review totals, "Verified Buyer," or testimonial claims without source evidence

Are there new operational boundaries the website, CMS, Marketplace templates, AI tools, or contractors must never imply?

- ☐ No additions
- ☐ Yes; list the wording or behavior to avoid: _____

2. Inventory Source of Truth Rule

☐ One physical piece = one inventory record = one SKU. Public content must be generated from the verified record, not from memory, an old caption, an AI guess, or a photo alone.

2.1 Inventory Home and Ownership

Where is the master inventory record maintained today?

1

2

3

4

5

6

Which system should become the authoritative record for Phase 1?

- ☐ CMS Suite
- ☐ Spreadsheet feeding CMS Suite
- ☐ Other: _____

Who may create, edit, approve, and publish an inventory record?

Action	Jennyfer	Anthony / Digital Allies	Other Notes
Create draft record	☐	☐	
Assign SKU	☐	☐	
Add source photos	☐	☐	
Verify measurements and condition	☐	☐	
Confirm price	☐	☐	
Change status	☐	☐	
Publish to website	☐	☐	
Archive after sale	☐	☐	

2.2 Required Record Fields

Before an item can move to Ready to List, can the record contain all required fields below?

☐ SKU

☐ Public name or working descriptive name

☐ Status

☐ Category

☐ Source and date acquired

☐ Approximate era and era confidence

☐ Maker or designer, if verified

☐ Materials

☐ Dimensions

☐ Weight or loading notes, if applicable

☐ Condition summary

☐ Detailed wear notes

☐ Preparation notes

☐ Restoration notes, if work occurred

☐ Acquisition notes

☐ Price

☐ Specific Marketplace URL, if listed

☐ Website publishing status/URL

☐ Instagram status/URL, if posted

☐ Primary image and gallery folder

☐ Date listed and date sold, when applicable

☐ Customer-photo release status, if applicable

☐ Internal notes

Which fields are most likely to be missing at first? What would make them easier to collect?

What should happen when a record is incomplete?

- ☐ Keep it in Acquired or In Prep until complete
- ☐ Allow Ready to List with an internal follow-up task
- ☐ Other: _____

2.3 Exact Status Rules

Confirm the status vocabulary below. These labels must be used exactly in the inventory system and should control website behavior.

Status	Meaning	Website behavior
Acquired	Internal only; not ready for public promotion	Do not publish
In Prep	Being cleaned, assessed, repaired, or staged	Do not publish as available
Ready to List	Record and photo set complete; not live yet	Do not publish as available
Available	Active Marketplace listing or confirmed inquiry path	Show "Ask About This Find"; show "View on Marketplace" only for a verified item-specific link
Pending	Buyer, hold, or deposit process in progress	Show "Currently Pending"; no immediate purchase invitation
Adopted	Sold	Remove price and purchase CTA; may move to sold archive
Archived	Portfolio/story record only	Not available; may show as archive
Needs Verification	Facts, ownership, or source evidence are unresolved	Do not publish as active
HOLD	Blocked pending owner decision or source material	Do not publish as active

7

8

How quickly must an item change from Available to Pending or Adopted after Jennyfer knows its status has changed?

- ☐ Same day
- ☐ Within 24 hours
- ☐ Within 2 business days
- ☐ Other: _____

2.5 Data-Quality Controls

The following rules apply to all inventory records, public content, and any system or tool that reads from or writes to the inventory.

SKU
Must be unique and exactly four digits. No duplicates permitted.

Status
Must use only the exact approved status vocabulary defined in section 2.3. No freeform or alternate labels.

Dates
All dates use YYYY-MM-DD format throughout the inventory system and any export or template.

Price
Uses a consistent currency format. Remains internal until Jennyfer has approved it for public display.

Marketplace URL
Must be item-specific before it can trigger a "View on Marketplace" CTA on the website. Generic or storefront-level URLs do not qualify.

Unknown Factual Fields
Must be left blank, marked unknown, or retained as an internal verification task. They may never be guessed, inferred from a photo alone, or filled by an AI without a verified source.

Public Fields
Must match verified inventory data exactly. No public-facing copy may be written from memory, an old caption, or an unverified source.

Product Photos and Marketing Assets
Must be final PNG files following the approved naming rule before they can be used in any public-facing context.

Made with GANMA

3. SKU, Naming & Files

3.1 SKU Control

Confirm the next new physical-inventory SKU begins at 0050.

☒ **Confirmed**

☐ **Needs audit before use**

☐ **Revised next SKU:**

Confirm the SKU rule:

☐ SKU range 0000-0049 is already assigned. New physical inventory begins at 0050 and increments upward. A SKU is never reused, including after an item is sold or archived.

☒ **Approved**

☐ **Revise:**

Who assigns the SKU, and at what moment?

Assigned by:

☐ _____

Trigger:

☐ When purchased/acquired

☐ When first photographed

☐ When entering the inventory record

☐ Other: _____

When a new batch changes the next available SKU, who updates the SKU naming-system document?

☐ Owner: _____

☐ Where is the current document kept? _____

3.2 Public Names and Descriptive Titles

How should a public name be created?

☐ Jennyfer names every piece

☐ Jennyfer names selected pieces; other titles stay descriptive

☐ AI proposes options; Jennyfer approves one

☐ Use descriptive names only

☐ Other: _____

If a name repeats, how should the public title distinguish the physical item?

Example: "Ramona Rattan Shelf" and "Ramona Bamboo Shelf."

Preferred pattern: _____

What naming tone should be avoided? List names, themes, puns, or language that are off-brand, confusing, too precious, culturally inaccurate, or difficult to search.

3.3 File and Asset Standards

Confirm the file and format rule:

☐ Source images may arrive in native capture or downloaded formats. Before an image becomes a final approved project asset, web asset, Marketplace export asset, or marketing asset, save it as PNG and apply the approved filename pattern.

☐ ☒ Approved as written

☐ ☐ Revisions needed: _____

Confirm this required filename pattern:

{slug}-{tag}-{number}.png

slug: lowercase kebab-case item nickname when unique; otherwise a short descriptive slug

tag for product photos: the 4-digit SKU

tag for non-product assets: a short descriptive tag, such as insta-post, website-banner, flyer, or holiday2026

number: begins at 1 and increments for each slug + tag pair

Examples:

ramona-0008-1.png

ramona-0008-2.png

atomicfindsatx-insta-post-3.png

fall-drop-website-banner-1.png

☐ ☒ Approved as written

☐ ☐ Revisions needed: _____

Where should the approved source-photo folder for each item live?

☐ Google Drive

☐ CMS Suite media library

☐ Both; explain source-of-truth order: _____

☐ Other: _____

What minimum photos are needed before a piece can be listed?

☐ Overall front

☐ Overall side/back

☐ Material/texture detail

☐ Wear, repairs, or condition detail

☐ Measurements

☐ Staged/context photo

☐ Other: _____

Is there a separate photo checklist for fragile, large, upholstered, glass, or outdoor pieces? If yes, describe it.

☐ Yes: _____

☐ No

4. Sourcing, Intake & Research

4.1 Intake at Acquisition

Where does new inventory usually come from? Check all that apply.

☐ Estate sales

☐ Auctions

☐ Facebook Marketplace or private sellers

☐ Thrift stores

☐ Flea markets or antique malls

☐ Private collections

☐ Trade or referrals

☐ Curbside/free finds

☐ Other: _____

What information can realistically be captured at acquisition?

- ☐ Seller/source name or listing link
- ☐ Date acquired
- ☐ Acquisition price
- ☐ Original seller description
- ☐ Original photos/screenshots
- ☐ Approximate location/source type without private customer details
- ☐ Maker labels, stamps, tags, or markings
- ☐ Known age, provenance, or prior ownership claim
- ☐ Initial condition photos
- ☐ Other: _____

What should be recorded immediately, before cleaning, repairs, styling, or moving the piece?

Who takes intake photos, and where are they uploaded on the same day?

4.2 Research Standards

Which research questions should be answered before a listing is written? Check all that apply.

- ☐ Identify furniture type and likely materials
- ☐ Transcribe labels, stamps, tags, or model information
- ☐ Estimate era
- ☐ Identify maker/designer only when supportable
- ☐ Compare construction details to credible references
- ☐ Identify replacement or safety concerns
- ☐ Confirm dimensions and loading considerations
- ☐ Research care guidance for material-specific preparation
- ☐ Other: _____

What sources count as acceptable support for public claims about age, maker, origin, material, or provenance?

- ☐ Original maker label, stamp, tag, or documentation
- ☐ Original seller/auction documentation retained in the record
- ☐ Reputable auction-house or established dealer reference
- ☐ Museum, manufacturer, library, archive, or published design reference
- ☐ Multiple comparable listings, labeled as an estimate rather than fact
- ☐ Jennyfer's direct knowledge, documented in the record
- ☐ Other: _____

What evidence is not sufficient on its own for a public claim?

- ☐ AI output
- ☐ An unverified image-search match
- ☐ A single resale listing
- ☐ Visual resemblance alone
- ☐ Memory without a source record
- ☐ Other: _____

When research is uncertain, which wording should be used?

- ☐ "Approximate era" or "estimated"
- ☐ "Maker unknown"
- ☐ "Unverified attribution" kept internal only
- ☐ Do not mention it publicly
- ☐ Other approved phrasing: _____

Who makes the final call to publish or remove a public maker, era, origin, or provenance claim?

- ☐ Final approver: _____
- ☐ Required evidence location: _____

4.3 Condition and Preparation Truth

What preparation is routinely performed before listing? Check only what happens consistently.

☐ Structural inspection

☐ Surface cleaning

☐ Conditioning/oiling wood, rattan, bamboo, or cane

☐ Light repair

☐ Deep repair

☐ Refinishing

☐ Paint

☐ Reupholstery

☐ Hardware replacement

☐ Odor/smoke/pet assessment

☐ Staging and photography

☐ It varies by item; document only item-specific work

Confirm this default public language unless a verified item record supports something more specific:

☐ Each find is carefully selected, inspected, and prepared for its next home. Condition, vintage wear, cleaning, repairs, and restoration work are noted on each individual listing.

☐ ☒ Approved as written

☐  Revise: _____

What conditions must always be photographed and disclosed before a listing can go live?

- ☐ Structural instability
- ☐ Cracks, breaks, or repairs
- ☐ Missing parts or hardware
- ☐ Scratches, stains, fading, or finish loss
- ☐ Cane/rattan/bamboo breaks or loose weaving
- ☐ Upholstery wear, odors, smoke, pet exposure, or staining
- ☐ Glass/chip/crack issues
- ☐ Other: _____

5. Listing, Publishing & Archive Workflow

5.1 Marketplace Listing Setup

What is the required order of work for a new item? Number these steps, or write your preferred order:

01	02	03
Assign SKU	Create inventory record	Capture intake/source evidence
04	05	06
Research item	Clean/prepare/repair	Photograph and save PNG assets
07	08	09
Measure item	Write listing draft	Jennyfer approves facts, condition, price, and policy language
10	11	12
Publish Facebook Marketplace listing	Save item-specific Marketplace URL to record	Publish/activate website item or inquiry path
13		
Create Instagram post/story if appropriate		

Does every Available website item need a current, item-specific Marketplace URL?

- ☐ Yes; hide Marketplace CTA until it exists
- ☐ No; a product-specific inquiry may be the active path
- ☐ Other: _____

Confirm: a general Marketplace profile link must not appear as "View on Marketplace" for a specific product.

- ☐ Confirmed
- ☐ Exception or revision: _____

Who verifies that a Marketplace link is still active before website publication?

- ☐ Owner: _____
- ☐ Verification step/location: _____

5.2 Listing Content and Approvals

Which information must appear in every Marketplace listing?

- ☐ Searchable furniture-type title
- ☐ Public item name, if used
- ☐ Price
- ☐ Approximate era only when sourced/appropriately qualified
- ☐ Materials
- ☐ Dimensions
- ☐ Condition summary and detailed wear notes
- ☐ Item-specific preparation/restoration notes
- ☐ Approved pickup language
- ☐ Loading/vehicle note when applicable
- ☐ Specific current photos
- ☐ Other: _____

Which information may appear on the website only after it is verified in the inventory record?

- ☐ Price
- ☐ Era or age
- ☐ Maker/designer
- ☐ Materials
- ☐ Dimensions
- ☐ Condition/wear
- ☐ Work completed
- ☐ Marketplace URL
- ☐ Availability
- ☐ All of the above

Who approves each draft before it is public?

Item	Content Drafter	Fact checker	Final publisher
Inventory record			
Marketplace listing			
Website card/page			
Instagram caption			
Archive/Adopted story			

5.3 Sold and Archive Workflow

When an item sells, what is the correct sequence?

01	02
Mark Marketplace listing sold/remove it	Change inventory status to Adopted
03	04
Remove price and buying CTA from website	Move item to Adopted Finds or Archive, if approved
05	06
Update social status/Highlight, if appropriate	Record date sold

Status definitions – Adopted vs. Archived:

Adopted Confirmed sold. Remove price and purchase CTA. The item may appear in an Adopted archive if approved.	Archived Not for sale and not necessarily sold. Use for withdrawn items, retained items, duplicate/merged records, or portfolio/story-only records. Do not present it as available.
---	---

Should adopted items retain any of the following?

- ☐ Public name and photos
- ☐ Approximate era/materials only when verified
- ☐ Condition/story/preparation notes
- ☐ "See Similar Finds" CTA
- ☐ Sale price
- ☐ Buyer name, home, or testimonial only with documented permission
- ☐ Other: _____

5.4 Marketplace Mismatch Procedure

 If the Marketplace listing, price, photos, or availability conflicts with the inventory record or the website, immediately change the website item to **Pending, Needs Verification**, or **hidden** until reconciliation is complete. Do not leave an item shown as Available while a conflict remains unresolved.

Who is responsible for identifying and resolving a mismatch?

- ☐ Responsible party: _____
- ☐ Resolution documented in: _____

What triggers a mismatch check?

- ☐ Price change on Marketplace not reflected on website
- ☐ Listing removed or marked sold on Marketplace but website still shows Available
- ☐ Photos updated on one platform but not the other
- ☐ Inventory record status differs from any published listing
- ☐ Other: _____

6. AI-Assisted Workflow Setup

📌 Operating principle: AI can organize, transcribe, summarize, draft, classify, research leads, and generate internal options. AI must not invent product facts, publish unsourced claims, make final pricing/condition decisions, or use private customer information without permission.

6.1 Approved AI Jobs

AI may assist with:

- ☐ Turn intake notes into a draft inventory record
- ☐ Transcribe tags, labels, measurements, and handwritten notes from photos
- ☐ Convert measurements into consistent format
- ☐ Propose descriptive public-name options
- ☐ Draft Marketplace listings from a verified record
- ☐ Draft website copy from a verified record
- ☐ Draft Instagram captions from verified facts
- ☐ Create condition-disclosure wording from approved notes
- ☐ Create research checklists and search queries
- ☐ Summarize saved research sources without adding claims
- ☐ Compare public copy against a verified record to flag mismatches
- ☐ Create file names according to the PNG/SKU standard
- ☐ Create internal task lists/status-change reminders
- ☐ Create Canva copy/briefs for real-item marketing assets
- ☐ Translate finalized, approved English factual copy into Spanish for review
- ☐ Other: _____

Must remain human-only:

- ☐ Final acceptance/rejection of inventory
- ☐ SKU assignment
- ☐ Pricing
- ☐ Condition and safety assessment
- ☐ Repairs/restoration claims
- ☐ Maker/designer/era/provenance approval
- ☐ Marketplace publishing
- ☐ Availability/pending/sold status changes
- ☐ Customer-message commitments, deposits, pickup details, or refunds
- ☐ Permission decisions for customer photos/reviews
- ☐ Other: _____

6.2 Source and Verification Gate

Confirm the AI verification rule:

☐ Every factual claim in public inventory copy must trace back to a field or source stored in the item's inventory record. If the record does not support a claim, AI must label it as a question, omit it, or use approved uncertainty language.

☐ ☒ Approved

☐ 🔄 Revise: _____

For AI research, where should source links, screenshots, quotations, and notes be stored?

☐ In the CMS item record

☐ Google Drive research folder linked from the item record

☐ Spreadsheet research column

☐ Other: _____

What needs a human review before AI output can be published?

☐ Every customer-facing item description

☐ Every Marketplace title and price

☐ Every condition statement

☐ Every era, maker, materials, or provenance claim

☐ Every caption with factual claims

☐ Every Spanish translation

☐ Every image/graphic before upload

☐ Other: _____

When AI cannot verify a fact, which behavior should it take?

☐ Leave a clearly marked placeholder such as [verify material]

☐ Ask a targeted follow-up question

☐ Use neutral copy that does not make the claim

☐ Move the record to Needs Verification

☐ Other: _____

6.3 Privacy, Permissions, and Customer Content

What information must never be pasted into a general AI chat or shared outside approved systems?

☐ Buyer full names, addresses, or precise pickup locations

☐ Private messages without permission

☐ Phone numbers and private email addresses

☐ Payment details

☐ Customer-home images without documented release

☐ Other: _____

For a customer photo, quote, review, or social message to be used publicly, confirm the required record includes:

☐ Content owner/contact

☐ Asset folder or item reference

☐ Permission date

☐ Allowed channels

☐ Credit/tagging preference

☐ Restrictions

☐ Revocation/follow-up notes

☐ Original review source, date, exact quote, and evidence

Do you want AI to help draft photo-use permission requests and review-approval requests?

☐ Yes

☐ No

☐ Later

6.4 Tool Access and Handoff

Tool	Jennyfer	Anthony / Digital Allies	Other Notes / permission level
Claude Tools	☐	☐	
Canva Tools	☐	☐	
CMS Suite	☐	☐	
GitHub Repository	☐	☐	
Google Drive inventory/photo folders	☐	☐	
Facebook Marketplace	☐	☐	
Instagram	☐	☐	

What is the preferred handoff method when AI produces a draft?

☐ AI draft → Jennyfer reviews in a shared document

☐ AI draft → Anthony formats in CMS → Jennyfer approves

☐ AI draft → inventory record receives review status

☐ Other: _____

What does "approved" look like for an AI-assisted listing or post?

☐ Jennyfer responds in writing

☐ Jennyfer changes the status to APPROVED

☐ Jennyfer publishes it herself

☐ Other: _____

6.5 Ownership Defaults (Recommended, Awaiting Confirmation)

☐ **Recommended defaults awaiting Jennyfer confirmation.** These role assignments reflect the intended operating model and should be reviewed and confirmed before going live.

Jennyfer owns:

- Product facts, price, condition, availability
- Marketplace publishing
- Buyer commitments
- Permissions
- Final approval

Anthony / Digital Allies owns:

- System configuration
- Content structure
- Templates
- Draft formatting
- Website implementation
- Status-aware website behavior
- QA

AI creates:

- Drafts and verification flags only
- Has no approval or publishing authority

7. CMS, Website & Design-System Controls

The current website is governed by the design system, so new inventory and operational content should use approved patterns rather than one-off layouts or invented CTAs.

7.1 Content Controls

Jennyfer can edit in CMS without developer support:

- Item status
- Price
- Marketplace URL
- Public item name
- Condition summary
- Photos/gallery
- Product description
- Featured/not featured setting
- Archive/Adopted story
- Other: _____

Requires Anthony / Digital Allies review before publishing:

- New design-system component or page type
- Changes to buyer flow or CTA behavior
- New policy or fulfillment language
- Design/branding changes
- Translation changes
- Newsletter or form behavior
- Other: _____

Which product-card information is required for each public status?

Public status	Required display	Forbidden display
Available	Verified public name; current status; approved price only if enabled; approved key details; "Ask About This Find"; Marketplace CTA only with verified active item-specific URL.	General Marketplace profile as item CTA; expired Marketplace link; unsourced claims; delivery/white-glove claims.
Pending	"Currently Pending."	Price if it implies immediate availability; purchase CTA; "View on Marketplace" unless confirmed appropriate.
Adopted	"Adopted"; optional approved archive/story content; optional "See Similar Finds."	Price; purchase CTA; buyer identity, home, or testimonial without documented permission.
Archived	"Archive"; optional approved archive/story content.	Availability claim; current price; purchase CTA.

Confirm the product CTA rules:

Available

"Ask About This Find." "View on Marketplace" appears only with a verified active, item-specific Marketplace URL.

Pending

"Currently Pending." No immediate-purchase invitation.

Adopted / Archived

Remove price and purchase CTA; use "Adopted" or "Archive," optionally "See Similar Finds."

Acquired / In Prep / Ready to List / Needs Verification / HOLD

Do not present publicly as available.

 **Approved as written**

 **Revise:**

7.2 Forms, Social, and Translation

Is the contact/inquiry form ready to route product-specific questions to a monitored destination?

- ☐ Yes; destination: _____
- ☐ Not yet; hide or defer item inquiry CTA until ready
- ☐ Needs testing

Is the newsletter form ready to publish?

☐ It may be public only when it has a real email-platform connection, consent language, privacy-policy link, success/error states, a defined list destination, and a basic welcome/confirmation workflow.

☐ Yes; system and owner: _____

☐ No; use social-follow CTA instead

☐ Later

How should any Instagram section be presented?

- ☐ Live integration with verified real posts
- ☐ Curated gallery clearly labeled as non-live
- ☐ Not included for Phase 1

Confirm translation workflow:

01
Finalize English factual copy first

02
Use AI only to draft Spanish after English approval

03
Human review confirms the two versions match in meaning, policy, and purchase instructions

Other: _____

Once Jennyfer communicates a live-item status change, the master inventory record is updated immediately and the website is reconciled within the owner-approved timing target.

8. Master Decision Log

Use this table to track all confirmed operational decisions, their owners, and implementation status.

Decision Area	Confirmed Decision	Owner	Confirmation Date	Evidence/Link	Implementation Status	Notes
Operating Model						
Inventory Home						
SKU Rule						
Public Boundaries						
Listing Workflow						
Marketplace Mismatch						
AI Permissions						
CMS Controls						
Status Timing						
Photo Format						
Ownership Defaults						
Other:						

8. Reusable Templates Needed

Check the templates that should be created first. These templates must pull from verified record fields, not prompt AI to invent missing details.

Inventory intake form	Research evidence log	Condition and measurements checklist	Marketplace listing template
Website product-card/page template	Product-specific inquiry response template	Instagram launch caption template	Instagram sold/adopted caption template
Photo-shot checklist	PNG export and file-naming checklist	Customer photo-use permission request	Testimonial/review verification record
Weekly availability audit checklist	Monthly archive/content refresh checklist	AI prompt template for a verified inventory record	AI prompt template for research questions only

Other: _____

Rank the top three needed first:

1. _____ 2. _____ 3. _____

First Implementation Batch

Choose a small first batch so the system is tested with real records before scaling.

Which 3-6 real pieces should become the first verified inventory records?

Working name	SKU	Current status	Source link/folder	Missing information	Owner / Target date

For this test batch, which success checks must pass before the workflow is reused?

- ☐ Each physical piece has one SKU and one inventory record
- ☐ Required facts are verified and sourced
- ☐ Product photos are PNG and follow the filename pattern
- ☐ Status correctly controls what appears on the website
- ☐ Marketplace CTA links to the exact active item or is hidden
- ☐ AI drafts match the verified record and contain no unsupported claims
- ☐ Jennyfer can approve/update the record without friction
- ☐ A sold/pending update can be completed within the agreed timing

Other: _____

What would make the workflow too burdensome? What can be simplified without sacrificing accuracy?

First-Batch Readiness Gate

The workflow may be reused and scaled only after 3-6 real test items demonstrate all of the following:

Inventory & SKU:

- ☐ Unique SKU assigned to each physical item
- ☐ One inventory record per physical item
- ☐ All applicable required fields completed

Content & Claims:

- ☐ All public claims are verified or appropriately neutral
- ☐ No unsupported AI-generated claims in public-facing copy
- ☐ Maker, era, and provenance claims are sourced and approved

Assets & Files:

- ☐ Approved PNG assets created and named correctly
- ☐ Filenames follow the {slug}-{tag}-{number}.png pattern
- ☐ Source photos and final assets organized and linked

Website Behavior:

- ☐ Correct website behavior by status (Available, Pending, Adopted, Archived)
- ☐ No items shown as Available without a verified buyer path
- ☐ Status changes reflected on website within the approved timing

Buyer Paths:

- ☐ Exact active Marketplace link verified and saved to record, OR
- ☐ Product-specific inquiry route tested and working

Approval & Governance:

- ☐ Owner approval captured in the record
- ☐ Fact review status marked APPROVED
- ☐ Owner approval status marked APPROVED

Status Transitions:

- ☐ Successful Pending or Adopted update within the chosen timing
- ☐ Marketplace listing reconciled with website
- ☐ No conflicts between platforms

Scope Boundaries:

- ☐ No full ecommerce features introduced
- ☐ No delivery, deposits, public hours, or public address
- ☐ No phone number, email, or customer testimonials as defaults
- ☐ No maker/era claims without verified sources
- ☐ All conditional features remain conditional on owner approval

Once all gates pass, the workflow is approved for ongoing use with real inventory.

9. Final Operating Agreement

List anything Atomic Finds ATX should never say, imply, publish, automate, or let AI assume.

What is the one operational change that would save Jennyfer the most time each week?

What is the one reporting view Jennyfer needs to understand inventory at a glance?

Available now	In Prep	Needs Verification	Ready to List
Pending	Adopted this month	Missing photos/details	Other: ____

What recurring review cadence is realistic?

- Daily 5-minute status check
- Twice-weekly inventory/website check
- Weekly update session
- Monthly content/archive review
- Other: _____

Final confirmation: Atomic Finds ATX will favor accuracy, traceable product evidence, and practical upkeep over a larger catalog or faster publishing.

☒ Confirmed	 Discuss
---	---

Internal Implementation Notes

For Anthony / Digital Allies after questionnaire completion:

- Convert confirmed answers into the inventory schema, CMS field permissions, publishing checklist, and reusable templates.
- Preserve one record per physical item and use the approved statuses exactly.
- Do not publish incomplete inventory as available.
- Do not publish a general Marketplace profile link as an individual item CTA.
- Keep public pickup language neutral unless policy details are confirmed.
- Use only verified, approved reviews, customer content, prices, dimensions, condition statements, restoration notes, and listing URLs.
- Treat AI output as a draft. It can assist with extraction, organization, formatting, research leads, and copy—but it cannot supply missing facts or override owner approval.
- Keep English factual copy as the source version. Draft Spanish only after English approval and verify both versions stay aligned.
- Save final product and marketing image assets as PNG using {slug}-{tag}-{number}.png.
